

Consumer Product Safety Commission

§ 1031.4

(b) In 1981, the Congress amended the Consumer Product Safety Act, the Federal Hazardous Substances Act, and the Flammable Fabrics Act, to require the Commission to rely on voluntary standards rather than promulgate a mandatory standard when voluntary standards would eliminate or adequately reduce the risk of injury addressed and it is likely that there will be substantial compliance with the voluntary standards. (15 U.S.C. 2056(b), 15 U.S.C. 1262(g)(2), 15 U.S.C. 1193(h)(2)). The 1981 Amendments also require the Commission, after any notice or advance notice of proposed rulemaking, to provide technical and administrative assistance to persons or groups who propose to develop or modify an appropriate voluntary standard. (15 U.S.C. 2054(a)(3)). Additionally, the amendments encourage the Commission to provide technical and administrative assistance to groups developing product safety standards and test methods, taking into account Commission resources and priorities (15 U.S.C. 2054(a)(4)). Although the Commission is required to provide assistance to such groups, it may determine the level of assistance in accordance with the level of its own administrative and technical resources and in accordance with its assessment of the likelihood that the groups being assisted will successfully develop a voluntary standard that will preclude the need for a mandatory standard.

(c) In 1990, Congress passed the Consumer Product Safety Improvement Act (CPSIA), amending section 15(b) of the CPSA to require that manufacturers, distributors, and retailers notify the Commission about products that fail to comply with an applicable voluntary standard upon which the Commission has relied under section 9 of the CPSA. CPSIA also amended section 9(b)(2) of the CPSA to require that the CPSC afford interested persons the opportunity to comment regarding any voluntary standard prior to CPSC termination and reliance.

§ 1031.3 Consumer Product Safety Act amendments.

The Consumer Product Safety Act, as amended, contains several sections pertaining to the Commission's participa-

tion in the development and use of voluntary standards.

(a) Section 7(b) provides that the Commission shall rely on voluntary consumer product safety standards prescribing requirements described in subsection (a) whenever compliance with such voluntary standards would eliminate or adequately reduce the risk of injury addressed and it is likely that there will be substantial compliance with such voluntary standards. (15 U.S.C. 2056(b)).

(b) Section 5(a)(3) provides that the Commission shall, following publication of an advance notice of proposed rulemaking or a notice of proposed rulemaking for a product safety rule under any rulemaking authority administered by the Commission, assist public and private organizations or groups of manufacturers, administratively and technically, in the development of safety standards addressing the risk of injury identified in such notice. (15 U.S.C. 2054(a)(3)).

(c) Section 5(a)(4) provides that the Commission shall, to the extent practicable and appropriate (taking into account the resources and priorities of the Commission), assist public and private organizations or groups of manufacturers, administratively and technically, in the development of product safety standards and test methods. (15 U.S.C. 2054(a)(4)).

§ 1031.4 Effect of voluntary standards activities on Commission activities.

(a)(1) The Commission, in determining whether to begin proceedings to develop mandatory standards under the acts it administers, considers whether mandatory regulation is necessary or whether there is an existing voluntary standard that adequately addresses the problem and the extent to which that voluntary standard is complied with by the affected industry.

(2) The Commission acknowledges that there are situations in which adequate voluntary standards, in combination with appropriate certification programs, may be appropriate to support a conclusion that a mandatory standard is not necessary. The Commission may find that a mandatory standard is not necessary where compliance with an existing voluntary standard would

eliminate or adequately reduce the risk of injury associated with the product, contains requirements and test methods that have been evaluated and found acceptable by the Commission, and it is likely that there will be substantial and timely compliance with the voluntary standard. Under such circumstances, the Commission may agree to encourage industry compliance with the voluntary standard and subsequently evaluate the effectiveness of the standard in terms of accident and injury reduction for products produced in compliance with the standard.

(3) In evaluating voluntary standards, the Commission will relate the requirements of the standard to the identified risks of injury and evaluate the requirements in terms of their effectiveness in eliminating or reducing the risks of injury. The evaluation of voluntary standards will be conducted by Commission staff members, including representatives of legal, economics, engineering, epidemiological, health sciences, human factors, other appropriate interests, and the Voluntary Standards Coordinator. The staff evaluation will be conducted in a manner similar to evaluations of standards being considered for promulgation as mandatory standards.

(4) In the event that the Commission has evaluated an existing voluntary standard and found it to be adequate in all but a few areas, the Commission may defer the initiation of a mandatory rulemaking proceeding and request the voluntary standards organization to revise the standard to address the identified inadequacies expeditiously.

(b) In the event the Commission determines that there is no existing voluntary standard that will eliminate or adequately reduce a risk of injury the Commission may commence a proceeding for the development of a consumer product safety rule or a regulation in accordance with section 9 of the Consumer Product Safety Act, 15 U.S.C. 2058, section 3(f) of the Federal Hazardous Substances Act, 15 U.S.C. 1262(f), or section 4(a) of the Flammable Fabrics Act, 15 U.S.C. 1193(g), as may be applicable. In commencing such a proceeding, the Commission will publish an advance notice of proposed

rulemaking which shall, among other things, invite any person to submit to the Commission an existing standard or portion of an existing standard, or to submit a statement of intention to modify or develop, within a reasonable period of time, a voluntary standard to address the risk of injury.

(c) The Commission will consider those provisions of a voluntary standard that have been reviewed, evaluated, and deemed to be adequate in addressing the specified risks of injury when initiating a mandatory consumer product safety rule or regulation under the Consumer Product Safety Act, the Federal Hazardous Substances Act, or the Flammable Fabrics Act, as may be applicable. Comments will be requested in the advance notice of proposed rulemaking on the adequacy of such voluntary standard provisions.

§ 1031.5 Criteria for Commission involvement in voluntary standards activities.

The Commission will consider the extent to which the following criteria are met in considering Commission involvement in the development of voluntary safety standards for consumer products:

(a) The likelihood the voluntary standard will eliminate or adequately reduce the risk of injury addressed and that there will be substantial and timely compliance with the voluntary standard.

(b) The likelihood that the voluntary standard will be developed within a reasonable period of time.

(c) Exclusion, to the maximum extent possible, from the voluntary standard being developed, of requirements which will create anticompetitive effects or promote restraint of trade.

(d) Provisions for periodic and timely review of the standard, including review for anticompetitive effects, and revision or amendment as the need arises.

(e) Performance-oriented and not design-restrictive requirements, to the maximum practical extent, in any standard developed.

(f) Industry arrangements for achieving substantial and timely industry
